

Position: Software Engineer

Who is Nexus Innovations?

Technologies and clients are at the core of what **Nexus Innovations** is all about, and if you are a technology professional who is **inspired by adventure**, change, learning, teamwork and service, you may find a great career fit at **Nexus Innovations**. We consider our employees our number one asset and it shows in everything we do – from investing in their professional development to offering them a challenging, rewarding and supportive environment. The pace is fast; however we also balance our work with life's priorities of family and community. Our company [culture and values](#) are key in assuring that trust and respect flourish with both clients and our teammates.

As a **Software Engineer**, you will work as part of the Development Team to design and develop applications for our clients.

What can you expect in the Software Engineer Position?

- Plan, design, modify, develop and implement software programming applications.
- Develop software requirements and specifications
- Work with clients to design and develop software for specific client applications.
- Schedule and organize development, testing, and documentation plans.
- Write status reports and coordinate project resources
- Write code and complete programming; testing of systems and applications.
- Convert project specifications and procedures to detailed logical flow charts for coding into computer language
- Market Nexus services to existing and potential clients
- Providing high-quality solutions and deliverables within defined timelines

What background will make you successful?

- 3+ years of experience developing ASP.NET applications
- 3+ years of experience with SQL Server (or other relational database)
- Excellent written and verbal communication skills
- Bachelor's degree or industry experience
- Ability to apply object-oriented programming skills
- Thorough knowledge of internet technologies and Web site architecture
